

Your first day with MaxOff

M Pixora Clips' app for your working day, your tasks, leave and expenses. Keep this on your phone.

MaxOff records when your day starts and ends, the tasks you are given, your leave and your expense claims. **Prishit** (the Owner) approves them. Working hours are flexible: MaxOff records what really happens and never guesses. All times are Indian time.

1 Get the app

- 1 Open your **invite link**: it comes by email (from notifications@mail.maxoff.in; check spam), and Prishit may send it to you as well. Tap **Continue to MaxOff** . It works once, within 24 hours, whichever you open first. Choose a password (at least 12 characters) → **Save password and sign in** .
- 2 **Android**: open **https://app.maxoff.in** in Chrome → **⋮ → Install app** .
iPhone: open it in Safari → **Share → Add to Home Screen** , then open MaxOff from the home screen and sign in once more.
- 3 From now on, open MaxOff from its icon. You stay signed in.

2 Turn on notifications

This is how a new task, a decision on your leave or a change request reaches you. Do it once, on your phone.

- 1 **iPhone**: do **Add to Home Screen** first (step 1) and open MaxOff from its icon. An iPhone notifies only the installed app; until then the band says "Install MaxOff to get notifications · How".
- 2 Just above the bottom bar is a slim band: **"Notifications are off · Turn on"**. Tap it.
- 3 A sheet opens. Tap **Turn on** , then **Allow** when your phone asks. The band goes away.
- 4 Check it: **Me → Send a test notification → Send test** .

- **Quiet hours**: between 10:00 PM and 7:00 AM nothing is sent to your phone. At 7:00 AM you get one notification with what happened overnight ("3 updates while you were away").
- A new task is also emailed to you.
- Tapping a notification opens what it is about.
- **Alerts** in the bottom bar keeps them all, newest first. The number on it is how many you haven't read; tap one to open it.

3 Every working day

Start. Open MaxOff when you start work. It asks:

Started working?
Start your day to record it.

[Start day]
On leave today? Choose leave
Just looking

- **Start day**: the start time is the moment you tap. Your day shows "waiting for approval" until Prishit approves it.
- **Just looking**: only checking something? It closes, and asks again later until you start.

End. When you finish: **My Day → End day** .

- Worked late? **Add an overtime note**: how long, and what you worked on.
- "Any expenses to claim today?" **No**, or **Yes** to claim them straight away (section 6).
- Confirm. **End day is final** for that day. You can still use the app afterwards.
- **Forgot to end it?** MaxOff reminds you in the evening. Until 5:00 AM the next morning (and before you start the new day), My Day offers **Yesterday not ended · End day** . After that the day stays "End of day not recorded". No time is ever made up: if you worked late, add an overtime note.
- **Your days off (Sundays to start with) and holidays**: no question at all. Worked anyway? **My Day → I worked today** .

Admins: the same, on Today.

4 Your tasks

Work is given to you as tasks, on the **Tasks** tab. **My tasks** is always in this order: Not noted · Changes requested · Overdue · Due today · Upcoming. Open a task and it shows **one button: your next step**.

- 1 **Noted.** A new task is under **Not noted**. Open it and tap **Task Noted** : it says you have seen it. Everyone on the task does this.
- 2 **Start.** Tap **Start work** when you begin.
- 3 **Done.** When it is finished, tap **Mark done** . In the note, **paste the Google Drive link** to your work (share the file or folder first, so the reviewer can open it). Files can't be uploaded in MaxOff yet. Past the deadline, it asks why it's late.

- Only the task's **primary owner** marks it done. **Details** on the task shows who that is.
- **After Mark done** the task is locked while it is checked. Prishit gives the final approval; an Admin may check it first.
- **Changes requested?** The task comes back with the reason at the top. Fix it, then **Mark done again** with the new link.
- **Chat** on the task is for questions and updates. "Chat · 2 new", or a small speech bubble on a task in the list, means comments you haven't read.
- **Work** has the brief and the stages to tick; **Activity** has everything that happened.
- See something that needs doing? **Tasks → Suggest a task** . Prishit or an Admin makes it a task, or tells you why not.

5 Leave

- **Me → Attendance & leave → Request leave** → **Leave** (a day or a range) or **Half day** (one date) → a reason if you like → **Request leave** .
- On leave today? Answer the morning question with **On leave today? Choose leave** .
- Prishit approves or rejects every request. Withdraw it while it waits; to change or cancel approved leave, tap it and ask. The original stays until he decides.
- On a **half day**, Start day and End day still work as usual.
- **Comp leave** shows in the form only when Prishit has given you comp leave, usually for extra work.

6 Expenses

- At End day: "Any expenses to claim today?" → **Yes** → **End day, add expenses** . Or any time: **Me → Attendance & leave → Expenses → Add expense** .
- Enter the **amount (₹)**, a **category**, what it was for and the date. **Add another** for more.
- A **receipt photo** is needed above ₹500 (Prishit sets the amount). Claims are for this month, or last month during the first 5 days of a new one.
- You can withdraw a claim until Prishit decides. You'll see Approved, Rejected (with his reason) or Paid.

7 Who sees what

Who	What they see of you
Prishit (Owner)	Everything: your start and end times, leave, notes, expense claims and tasks. He decides each one, and when he changes something you see his reason in Attendance & leave .
Admins	The tasks they give you or check, and those for their clients. Never your times, notes, reasons or claims: when an Admin gives you a task, MaxOff only warns them if you are on leave or already busy that day.
Other Crew	Only the tasks you share with them.
You	Your own tasks, attendance, leave and claims. On a task, the client's name; never a client's page, money or other people's tasks.

MaxOff collects facts; it never rates you, and nothing is overwritten.

8 When something goes wrong

If...	Then
You forgot your password	Sign-in screen → Forgot your password? → your email → open "Set your MaxOff password" (from noreply@mail.maxoff.in; check spam) → Continue to MaxOff → set a new one.
The invite link says "expired or already used"	Ask Prishit for a new one.
No notifications arrive	Me → Notifications says what is wrong on this phone. On iPhone, open MaxOff from its home-screen icon. Then Send test .
The band's sheet says "Notifications are blocked on this device"	Allow notifications for MaxOff in the browser's site settings (or the app's info screen), then open MaxOff again.
A day says "End of day not recorded"	You didn't end it in time. Worked late? Add an overtime note. Anything wrong? Tell Prishit: he can correct any day, with a reason you'll see.
A day looks wrong	Attendance & leave → Attendance shows each day's story. Tell Prishit.
Your phone is lost or shared	Me → Sign out of this device , and tell Prishit.
Anything else	Tell Prishit.
