What's new in MaxOff v1.4

Reminders, a simpler bottom bar and fewer emails. A short guide for Owner, Admins and Staff.

Do this once, today

1. Close MaxOff fully and open it again, so the update loads.
2. If you see a band saying **"Check notifications reach you"**, tap **Send a test**.
3. Tap **Task Noted** on any task you haven't noted yet. Reminders now start for unnoted tasks.

EVERYONE Changes for all roles

- **Task reminders.** MaxOff now reminds the people on a task **2 days before**, **1 day before** and **when it's due**, and again **1 hour after** if it's overdue.
- **Fewer emails.** If notifications work on your phone, a new task no longer sends an email too. Important messages still come by email: the last reminder before a deadline, overdue reminders, escalations and event reminders.
- **Quiet hours.** Notifications are held between **10 pm and 7 am** and arrive together at 7 am. Important emails are not held.
- **Alerts** (the bell at the top) are grouped by day, with an **Unread** filter. Several alerts about the same task show as one row.
- **Clearer notifications.** Each one carries a small picture for its kind: tasks, approvals, leave and attendance, reminders, or other.
- **Your devices.** `Me → Your devices` lists every phone or computer that gets your MaxOff notifications. Remove the ones you no longer use.
- **Help.** `Me → Help & troubleshooting` lets you send a test notification, reload the app and see the app version.
- **The notifications band** stays until a notification has actually reached one of your devices, and comes back if they stop working, telling you why.
- **Smoother pages.** Tapping early, switching views or a slow connection no longer reloads or freezes a page.

STAFF What changes for you

- **New bottom bar:** My Day · Tasks · Calendar · Leave · Me. Alerts are under the bell at the top.
- **Leave** now holds two tabs: **Leave requests** and **Attendance**.
- `Me → Extra work & expenses` puts both in one place, in two tabs.
- **"Please note this task."** If you haven't tapped **Task Noted**, you'll be reminded **every 2 hours**. After 4 hours your Admin is told, and after 8 hours the Owner is.
- **Overdue tasks:** if a task is still overdue 24 hours after its deadline, your Admin and the Owner are told.

ADMIN What changes for you

- **Escalations to you:** a task you approve (or created, when it has no approving Admin) that is not noted for **4 hours** or overdue for **24 hours**.
- **Reminder settings** on a task (one line in the task form, tap to change) and on your templates. Leave it as "Using the default" unless a task needs something different.
- `Settings → Notifications` shows whether the people on your tasks can be reached. If someone can't be, ask them to tap **Send a test**.

OWNER What changes for you

- **A morning email at 8 am** with yesterday's attendance, tasks approved, overdue and waiting for you, leave and expense requests waiting, and anyone who can't be reached. It never shows amounts.
- **Escalations to you** for a task not noted for **8 hours** or overdue for **24 hours**.
- **An alert when someone can't be reached** for 48 hours, at most once a week per person.
- `Settings → Notifications`: everyone's status, phone or computer, and last delivery.
- `Settings → Thresholds`: quiet hours and the default reminders. `Settings → Task types`: a reminder schedule per type.
- **Housekeeping:** alerts that have been read are removed after **90 days**. Unread alerts are never removed.

NEW JOINERS First sign-in

- A short walkthrough on the welcome screen: **install** MaxOff (on iPhone, from Safari), **turn on notifications**, **send a test**. It can be skipped with "Later". People already using MaxOff won't see it.

At a glance: who hears what, and when

When	Staff on the task	Admin	Owner
Task not noted, every 2 h	Reminder		
Not noted after 4 h		Escalation	
Not noted after 8 h			Escalation
2 days, 1 day before, when due	Reminder		
1 hour overdue	Reminder	Reminder	
24 hours overdue		Escalation	Escalation

These are the default times. A task can carry its own reminders, set by whoever created it. Leave, comp leave and holidays pause reminders until your next working day. Escalations are never paused.
